### **Openness and transparency at Azomures' meetings with candidates for Târgu Mureș City Hall**

Azomures recently completed the series of meetings it had with public figures who registered for the election race for Târgu Mureș City Hall and who accepted the management's invitation. The approach was initiated by the general manager of the company, Harri Kiiski and is part of Azomures' strategy to provide open and transparent information about the plant's activity.

The local community, represented after the September 27th election by one of these candidates, is an active partner of Azomureș, partly through the employees who come from it, partly from the inhabitants who need to know more details about how the facilities on industrial platform and what is our impact on the environment.

During the meetings, the candidates were presented with the same set of information regarding general aspects of the company, the results of the investments from 2012 to 2016 in terms of environmental protection, safety performance in occupational safety and measures taken on process safety, communication and importance in Romanian agriculture. General Manager Harri Kiiski answered all the questions raised by the candidates, questions were raised on environmental performance, health of Targu Mures citizens, noise pollution, employment and so on. Regarding the level of ambient noise at certain times of start / stop of some installations it was explained how the installations on the platform operate continuously, except for the shutdowns, for carrying out technical or unscheduled maintenance work.

"I had an open dialogue with the representatives of the local community and I am glad that I had the opportunity to present the results we recorded. Azomures has made important progress in recent years, thanks to the investments made by Ameropa Group. I am aware that history is not on our side, there were years when the lack of transparency created various legends, but I can assure the people of Targu Mures that today, Azomureș, is a modern company that respects the European rules of operation ", said Harri Kiiski, general manager of Azomureș.

In recent months, Azomureș has presented in the public space several results recorded following investments between 2012 and 2016, which show a significant reduction in the impact on the environment. The modernization of some equipment within the installations for the production of fertilizers for agriculture, allows at this moment the operation in safe conditions, for the community and the environment.

We wish good luck for all candidates in the elections and encourage citizens to participate in large numbers to select their favourite candidate.
